Dear Doctor Henney,

I very strongly support mandatory labeling of foods with genetically modified ingredients. As a consumer I have the right to choose for myself between genetically engineered and non-genetically engineered products. I can't believe that there can be any question about this right - the folks who are doing the engineering should be able to stand up to the scrutiny of the public who can then make an informed choice.

Please put me in the camp of mandatory food labeling.

Thank you.

Sincerely,

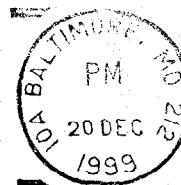

Eileen Zack
